DETAILED ACTION

Claim Objections

Claims 21-23, and 28 are objected to because of the following informalities: In claim 21, line 1, "the requests for information" lacks antecedent basis. In claim 22, line 3, it appears "infomration" should be --information--. In claim 28, "the provider's resume" lacks proper antecedent basis. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-2, 6-7, 9, 14, 17, 20 are rejected under 35 U.S.C. 102(e) as being anticipated by Durand et al. '467.

Durand et al. disclose or inherently teach all the limitations of the claims including a scoring system having a predetermined formula (See, for example, Col. 12--Col. 14; and Fig. 5b); a management and sequencing system (See, for example, Col. 6, line 31); a reporting system that sends messages (See, for example, Col. 19);

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3627

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3-5, 8, 10-13, 15-16, 18-19, and 21-28 are rejected under 35

U.S.C. 103(a) as being unpatentable over Durand et al.

Durand et al. lack the specific teaching of the limitations in the claims.

It would have been an obvious design choice to one of ordinary skill in the art at the time of the invention to modify Durand et al. to include the lacking limitations, in order to provide a desired outcome/result, as these limitations are well known in the art of e-commerce and other e-business applications (***See cited prior art for further reference***).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
